

Brazilian Domestic Aerogrammes

The 1997 Issue

Introduction

Pursuant to Law No. 5,895 of 1973 and Decree 2,122 of 1997, it is established an exemption from bidding and guarantees the exclusivity of printing Brazilian postage stamps to the Brazilian Mint (CMB). The production of any other postal product, such as aerogrammes, does not fit this exclusivity, and may be issued by the CMB, by Correios' own printing facility in the city of Rio de Janeiro or through a bidding process to hire an external printing company, which must prove besides interest, technical capacity and fiscal regularity.

Taking into account only the study of the 1997 Domestic Aerograms, the quantity produced of each model was defined in Flowers with 3,000,000, Southeast Region with 4,400,000 and South Region with 6,600,000, however its printing was demanded according to the need and stock limitation at the different Post Offices. The print run was not necessarily carried out at once or in its entirety, as there are no documents confirming the print run of each order with the issuer. In this way, the reason for this exhibit is precisely the study of the different graphic and physical aspects generated by the different orders.

Objective

Present the study of the aerogrammes of Brazil, for domestic use, issued in the year 1997, with 3 motifs, which are *FLOWERS*, and the *SOUTHEAST* and *SOUTH* regions of the country.

Development

The collection is developed according to the type and chronological order of issues. All aspects of aerogramms such as type of paper and Fluorescence are analyzed and presented.

Condition

The aerogrammes and material herein presented are all new and kept as printed by the official printer utilized by the Brazilian Postal Administration at the time of issuance. The use of new aerogrammes is necessary due to the difficulty in finding circulated pieces in good condition, as well as, important information that are printed on the closing edges which are detached and discarded when opening the correspondence like year of printing, and issuing printer.

Author's original study

This is an original study produced by the author with the presentation of a lengthy personal study on the different papers and Fluorescence used in this issue as control and proof of authenticity accompanied by *two rare* pieces with the absence of colors.

Guidance

1. Flowers
2. Southeast Region
3. South Region

Bibliography:
