2. Kartsev B.I., Brusnikin D. M., «Animals on postage stamps of African countries»-M-M.: Connection, 1980.
3. Y. Parfenov, «Little animals»: 2024г.

Zebra.

Amazing animals zebras are very interesting for their looks and intelligence. They look like horses but they are not. They live in the wild only on the continent of Africa. Zebra stripes are unique, they look like fingerprints. Zebras like horses sleep standing up. Zebra crossing was named after zebras.

Rhinoceros.

Марки разных стран с одним и тем же изображением.

White rhino (rhinoceros)
 White rhino is the second biggest animal on the planet.
 Females and males have horns on the muzzle.
 Rhinos eat shrub shoots and grass.
 Rhinos love water very much, and they swim a lot and after that they lie in mud like elephants to remove the parasites and cool down.
 Rhinos have amazing smell and good hearing
 They can smell food or enemy from far away.
 The longest horn of white rhino was 158 sm long.

белый носорог и обыкновенный перепел

Elephant.

Elephants are the biggest land animals in the world. They can weigh 5 tone and be 5 meters tall. Elephants are easy to train, they can carry things up to 350 kilos. Elephants use their trunks to lift objects, make sound warnings, say hello to elephants or water to drink and shower.

Elephants are very strong, smart and very emotion. They have fenomenal memory. They live in herds, which are led by old females. Elephants can run up to 40 km/h. Elephants sleep standing up, leaning on each other. On the 22 September people, celebrate Elephant Protection Day.

Leopard.

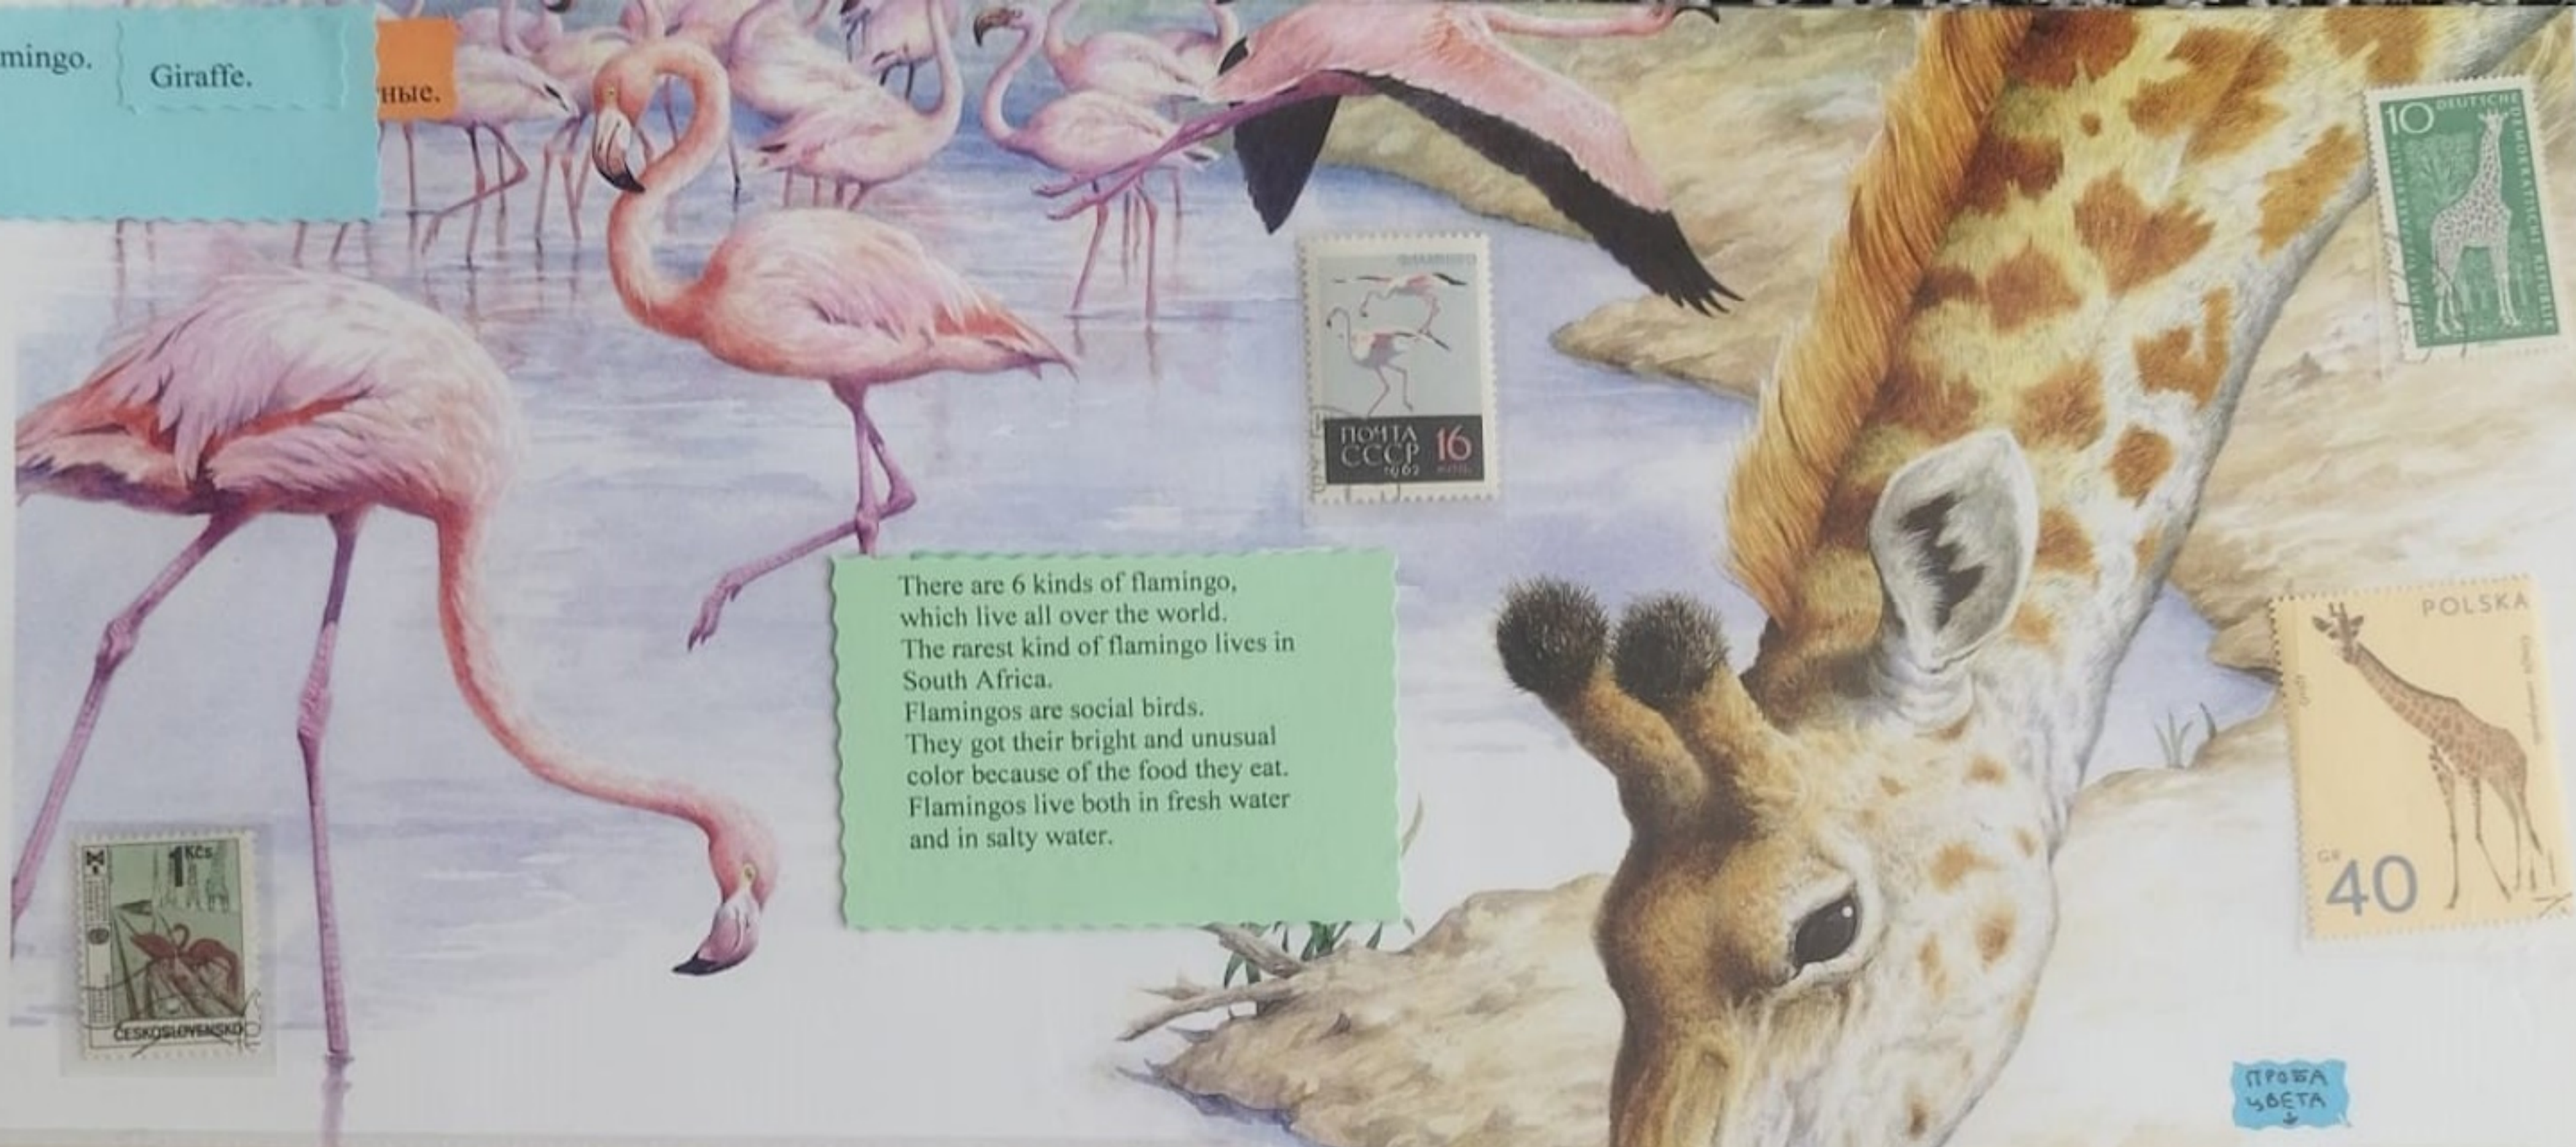

Leopards are the most popular representatives of the feline family after pet cats. Most leopards live in the meadows of Africa to the South of Sahara. But they also live in other area of our planet. Leopards can climb trees well. They are amazing and fast hunters, and they can easily adapt to different natural conditions.

Flamingo.

Giraffe.

ныс.

There are 6 kinds of flamingo, which live all over the world. The rarest kind of flamingo lives in South Africa. Flamingos are social birds. They got their bright and unusual color because of the food they eat. Flamingos live both in fresh water and in salty water.

ПРОБА
УВЕТА
